Child and Adult Care Food Program: New USDA Waivers

The U.S. Department of Agriculture (USDA) has issued the first set of nationwide child nutrition program waivers based on the Families First Coronavirus Response Act. The three nationwide waivers will support Child and Adult Care Food Program (CACFP) providers and programs in maintaining access to nutritious meals for children in the current COVID-19 public health emergency. The waivers will do the following:

- allow non-congregate feeding in CACFP programs, including offering meals off-site, via “grab and go,” and through delivery (https://www.fns.usda.gov/resource/cn-covid-19-non-congregate-feeding-nationwide-waiver);
- allow the suspension of meal times as needed in CACFP (https://www.fns.usda.gov/resource/cn-covid-19-meal-times-nationwide-waiver); and

Take Action

- State agencies need to quickly inform their regional office that they elect to use these waivers.
- Providers, programs, sponsors, advocates, and State agency staff can work in partnership to implement these waivers to provide meals to all participants in a safe and accessible manner.
- Check USDA’s list of COVID-19 waivers issued for your state: https://www.fns.usda.gov/disaster/pandemic/covid-19/cn-waivers-flexibilities

These waivers are effective immediately, and remain in effect through June 30, 2020, or upon expiration of the federally declared public health emergency, whichever is earlier.
