

## **Afterschool Meals and the President's Budget**

The president's fiscal year 2020 budget does not propose any direct changes to the federally funded Afterschool Meal and Snack Programs. These child nutrition programs, like the National School Lunch Program, the School Breakfast Program, and the Summer Nutrition Programs, are federal entitlement programs and are not part of the president's proposal for the discretionary budget. The proposed budget does, however, **zero out** funding for the 21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC), the largest federal funding source for operations of afterschool and summer programs. Taking this step would eliminate the funding for afterschool and summer programs that serve 1.7 million children<sup>i</sup> **and**, by shutting down or shrinking such programs, would have a direct negative domino effect on low-income children's access to nutritious meals and snacks after school and during the summer.

Eliminating funding for 21<sup>st</sup> CCLC would hurt children academically and increase childhood hunger:

- **21<sup>st</sup> CCLC provides educational and enrichment programming that numerous evaluations have found to improve academic achievement and test scores.** These evaluations reinforce the expansive body of research that identifies the important role that afterschool programs play in supporting academic success. To illustrate, regular attendance at 21<sup>st</sup> CCLC has been linked to improvements in students' homework completion rates, as well as reading and math achievement scores.<sup>ii</sup>
- **21<sup>st</sup> CCLC provides the platform for tens of thousands of afterschool and summer nutrition programs.** Offering educational and enrichment programming is a requirement for afterschool nutrition programs and the vast majority of summer food sites offer some type of programming.
- **The meals and snacks that children receive at 21<sup>st</sup> CCLC**

**programs play an important role in reducing hunger.** During the school year, low-income students can receive afterschool meals and snacks that help to ensure they do not miss an evening meal due to empty cupboards at home. In the summer, more families struggle to put food on the table when their children lose access to school breakfast and lunch — data show hunger spikes during the summer and the impact of lost meals is greater in states with low participation in the Summer Nutrition Programs.<sup>iii</sup>

- **The programming, along with the food, draw children into educational and enrichment programs that keep children safe and out of trouble while their parents work.** An evaluation of the afterschool meal program in the District of Columbia Public Schools school district found that afterschool program participation increased by 702 children the year after it implemented the afterschool meal program.<sup>iv</sup> A study conducted by the Afterschool Alliance found that 8 in 10 parents reported afterschool programs helped them keep their jobs and 3 in 4 parents felt afterschool programs give working parents peace of mind.<sup>v</sup>

Combined, 21<sup>st</sup> CCLC, the Afterschool and Snack Programs, and the Summer Nutrition Program support better outcomes for children all year long. Taking 21<sup>st</sup> CCLC out of the equation means many fewer children will have access to the nutritious afterschool and summer meals provided through the federal child nutrition programs, and their food security, health, and learning will suffer.
